

Roxy Quotation & Event Management Platform

Overview

The Roxy Quotation & Event Management Platform is a centralized web application designed to manage the complete quotation and event process in one place.

Today, quotation requests come from multiple sources such as emails, WhatsApp, verbal requests from hotel staff, and the website enquiry form. These requests are managed manually, making it difficult to track their progress and increasing the chances of delays or missed follow-ups.

This platform will digitize the entire process, allowing the team to manage quotations, follow-ups, approvals, event planning, equipment allocation, and billing from a single system.

The objective is to save time, improve accuracy, reduce manual work, and provide complete visibility into every quotation and event.

Objectives

The platform aims to:

- Centralize all quotation requests.
 - Reduce manual paperwork.
 - Improve quotation turnaround time.
 - Track every quotation from enquiry to billing.
 - Avoid missed follow-ups.
 - Organize upcoming events.
 - Manage equipment requirements efficiently.
 - Generate invoices quickly.
 - Provide management with a real-time business dashboard.
-

Request Sources

Quotation requests can be received through:

- Email
- WhatsApp
- Verbal requests from hotel staff
- Website enquiry form

Regardless of where the enquiry comes from, every request will be entered into the system so that it can be tracked throughout its lifecycle.

Customer Types

The platform supports two customer categories:

Direct Clients

These are customers who book services directly with Roxy.

For direct clients:

- Quotations are generated in PDF format.
 - Bills are generated on the day of the event.
-

Hotel Clients

Hotels often require quotations that they can edit before forwarding to their own customers.

For hotel clients:

- Quotations are generated in Excel format.
 - Billing is done at the end of the month.
-

Platform Features

1. Lead & Enquiry Management

Every enquiry is stored in one central location.

Information captured includes:

- Customer name
- Contact details
- Company/Hotel
- Event details
- Event date
- Venue
- Source of enquiry

- Assigned staff member

This ensures that no enquiry is lost.

2. Quotation Management

Staff can create quotations directly from the enquiry.

The quotation will include:

- Equipment list
- Quantity
- Pricing
- Taxes (if applicable)
- Notes
- Terms & conditions

The system will automatically generate:

- PDF quotation for direct clients
 - Excel quotation for hotel clients
-

3. Quotation Revisions

If a customer requests changes, such as:

- Adding equipment
- Removing equipment
- Updating quantities
- Changing prices

A revised quotation can be created while keeping a history of previous versions.

This helps track what changed and when.

4. Quotation Status Tracking

Every quotation will have a status, such as:

- Draft
- Sent
- Pending
- Approved

- Cancelled
- Revision Requested

This gives the team a clear picture of the progress of each quotation.

5. Follow-up Management

The platform allows staff to record follow-ups after a quotation has been sent.

Examples include:

- Called customer
- Sent reminder email
- Waiting for approval
- Customer requested changes

This helps ensure that no quotation is forgotten.

6. Event Management

Once a quotation is approved, it is converted into an event.

The event record includes:

- Event date
- Event venue
- Customer
- Equipment required
- Staff assigned
- Special instructions

This helps the operations team prepare for the event.

7. Equipment Planning

After approval, the required equipment can be planned for the event.

This helps ensure that:

- Required items are available.
 - Equipment is allocated correctly.
 - Event preparation starts on time.
-

8. Invoice Generation

Billing differs depending on customer type.

Direct Clients

Invoice is generated on the event day.

Hotel Clients

Invoices are generated at the end of the month for all completed events.

9. Dashboard

The dashboard provides management with a live overview of business activities.

It displays information such as:

- Total enquiries
- Total quotations
- Pending quotations
- Approved quotations
- Cancelled quotations
- Upcoming events
- Monthly revenue
- Recent follow-ups
- Pending invoices

This allows management to monitor operations without checking multiple files or messages.

Complete Workflow

Step 1 – Receive Enquiry

A quotation request is received through:

- Email
- WhatsApp
- Hotel staff
- Website

The enquiry is entered into the system.

Step 2 – Create Customer Record

If the customer is new, a customer profile is created.

If the customer already exists, the existing profile is used.

Step 3 – Create Quotation

Staff prepare the quotation by selecting:

- Equipment
- Quantity
- Pricing
- Event details

The system generates the appropriate quotation format based on customer type.

Step 4 – Send Quotation

The quotation is sent to the customer.

- Direct clients receive a PDF.
- Hotels receive an Excel file.

The quotation status changes to "Sent."

Step 5 – Follow-up

Staff contact the customer to check whether they have reviewed the quotation.

The follow-up details are recorded in the system.

Step 6 – Revision (If Required)

If the customer requests changes, staff update the quotation.

A revised version is created and sent again.

The previous version remains stored for reference.

Step 7 – Approval

Once the customer approves the quotation, the status changes to "Approved."

Step 8 – Event Preparation

The operations team begins preparing for the event by arranging:

- Equipment
- Materials
- Staff
- Logistics

This ensures everything is ready before the event date.

Step 9 – Event Completion

The event is successfully executed.

The platform records the completion of the job.

Step 10 – Billing

Direct Clients

Invoice is generated immediately after or on the day of the event.

Hotel Clients

Invoices are generated at the end of the month based on all completed events.

Benefits of the Platform

By implementing this platform, Roxy will benefit from:

- One centralized system for all enquiries and quotations.
- Faster quotation creation.
- Standardized quotation formats.
- Easy quotation revisions.
- Better follow-up management.

- Improved visibility into quotation status.
 - Organized event planning.
 - Reduced manual work.
 - Fewer missed opportunities.
 - Faster billing process.
 - Better reporting for management.
 - Higher operational efficiency.
 - Scalable processes that support future business growth.
-

Future Enhancements (Optional)

The platform can be expanded in the future with features such as:

- WhatsApp integration for sending quotations.
 - Email integration for automatic quotation delivery.
 - Customer approval through a secure online link.
 - Digital signatures.
 - Inventory tracking.
 - Staff attendance for events.
 - Expense management.
 - Payment tracking.
 - Customer portal.
 - Mobile application for field staff.
 - Business analytics and revenue reports.
 - Automated reminders and notifications.
 - Multi-branch support.
 - Role-based permissions for different departments.
-

Conclusion

The Roxy Quotation & Event Management Platform will replace scattered manual processes with a single, organized system that manages every stage—from receiving an enquiry to generating the final invoice. It will improve efficiency, reduce errors, increase visibility, and help the team handle more events with less administrative effort while providing management with complete control over daily operations.
